AGILAB

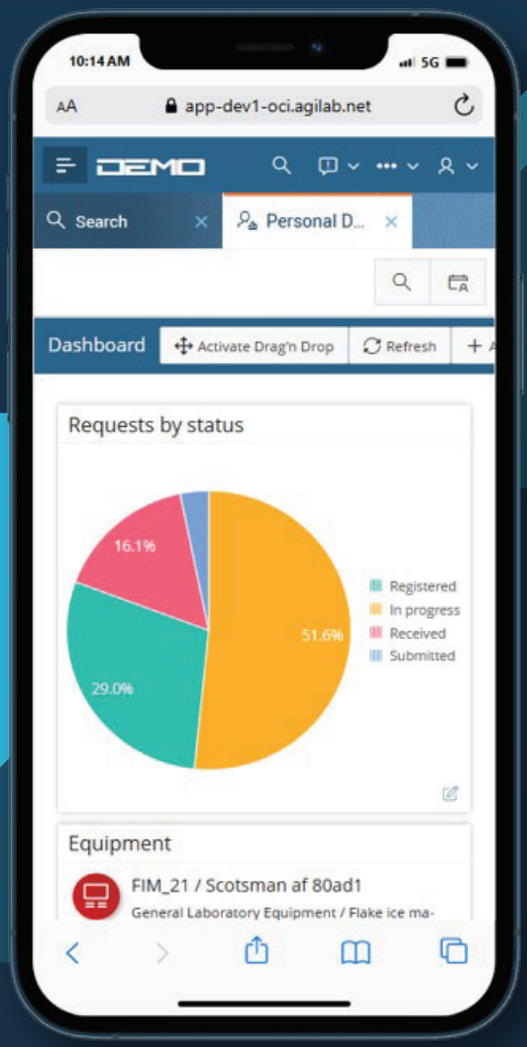
COMPANY **BROCHURE** 2023

About **Us**

AgiLab helps life sciences organizations, pharmaceutical companies and regulated industries to be more productive and compliant by improving research and development (R&D) efficiency and ensuring quality control (QC) compliance to deliver faster innovative and safe products to the world.

What benefits **AgiLab can bring to you?**

- Applications
- Execution
- Collaboration
- Compliance
- Centralized System
- Adaptability



Why **AgiLab?**

In laboratory terms Agilab have taken the concept of a digital foundation “back to formula”. We have developed true platforms for the modern lab, building applications and functions from the ground based on what is required, rather than what is achievable through legacy systems.

Our **Solution**

Our main purpose is to help laboratories to become more efficient by digitalizing manual and paper-based processes from product development through manufacturing. Then, we offer an ORACLE cloud built platform to fullfill that purpose:

AgiLab's Unified Laboratory Digital Foundation !

Modern

Empower your user experience for rapid adoption, efficiency and memorability with a modern looking user interface.

Adaptable

Thrive as your laboratory changes by extending features and integrating with other technologies on a flexible and secure platform.

Intelligent

Achieve greater return on investment by leveraging the power and flexibility of cloud and analytics technologies.

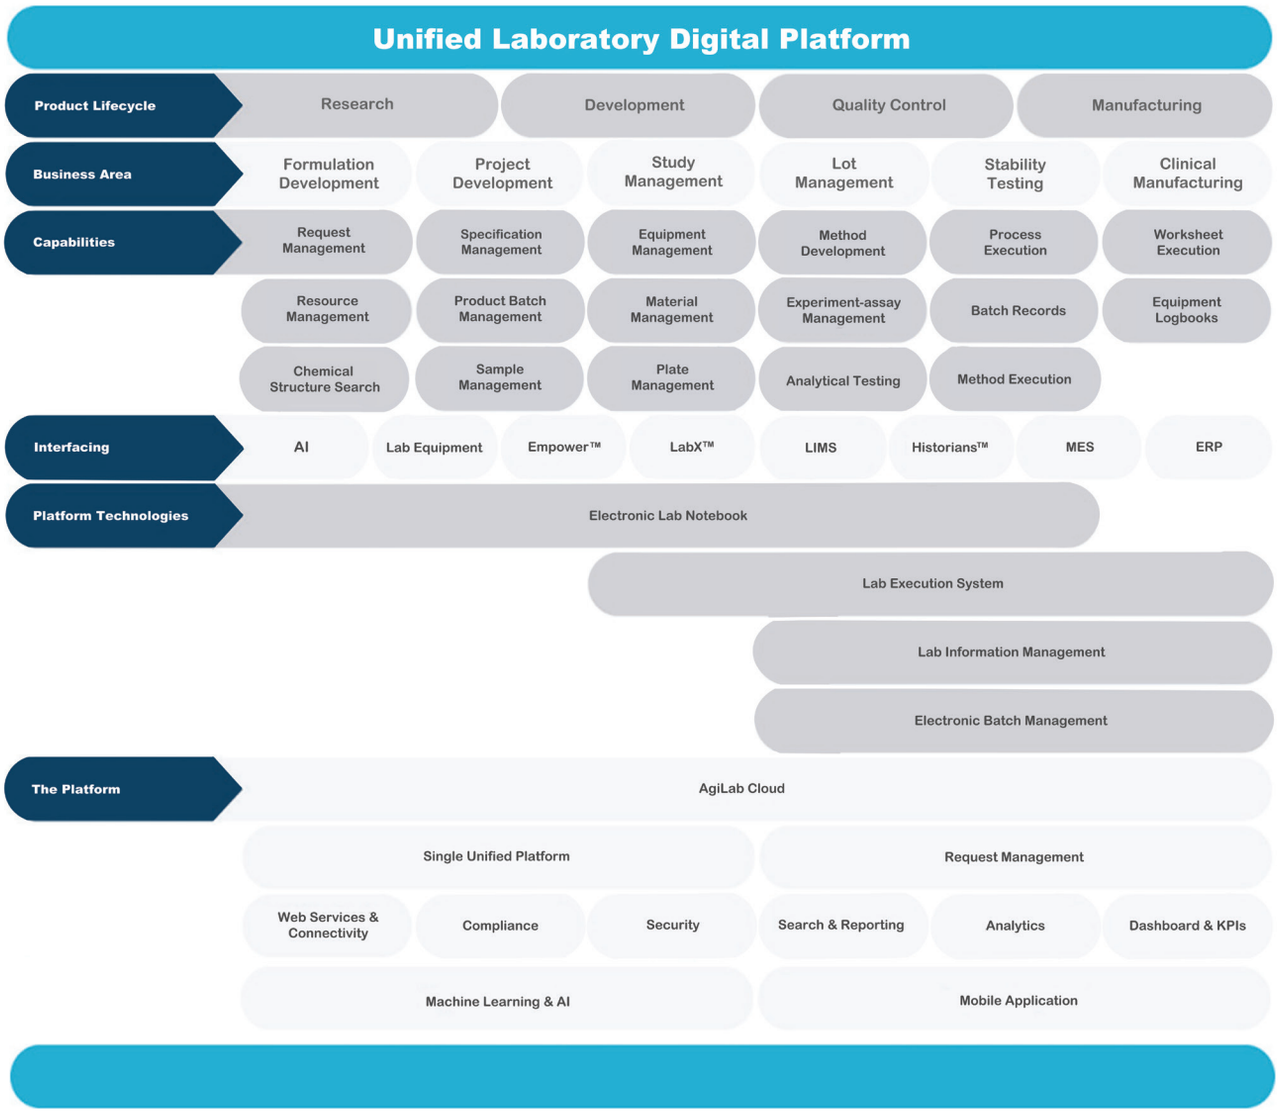
Unified

Optimize your laboratories by unifying processes and remove reliance on paper through a common platform and user interface.

The **Regulatory**

- Extensive experience working in highly regulated environments in Pharma, including GLP, GMP, GCP
- Quality systems and compliance training in place across our team and partners
- Regular audits by customers including some of the top pharmaceutical, biotech and specialty chemicals companies.
- Validation services aligned with FDA regulatory guidance such as 21 CFR Part 11, GMP, GLP, CLIA & CAP etc.
- The certification is ISO 17025 and ISO 9001

Digital **Foundation**



With AgiLab, you'll establish an Digital Lab Foundation (DLF) that connects your entire organization from R&D to manufacturing, empowering teams with increased visibility, greater control, and richer, more actionable data.

Contact **Us**

AgiLab is named as a Representative Vendor in Gartner Market Guide for Lab Informatics

Address: Headquarter AgiLab 157 Boulevard MacDonald 75019 Paris- FRANCE
